

Internet Services Provider Management, Related Technology Restrictions and Procurement Process Overview

(Revised June 2012)

There are many issues to consider in selecting and procuring ISP for use in the Chinle Unified School District # 24:

- Evidence and research base of its effectiveness of the Service.
- Proposals are done based on an approved design, effective and cost effective without downgrading services in place already and may consult with a second opinion.
- Suitability for CUSD # 24 IT department needs and Services.
- Suitability for Technical Staff and IT administrators' needs resulted on an Engineering design and both teams agree on reliable for the next few years.
- total cost of ownership (purchase, subscription, installation, maintenance, licenses)
- platform compatibility and system overhead.
- Project change should be done based on mutual agreement on Engineering design benefiting CUSD # 24 IT department Services.
- Internet bidders or future CUSD # 24 partners must comply will standards and guidelines already in place Servicing CUSD # 24 Staff, users, administrators and parents.
- CUSD # 24 Technology is standardized with Cisco, Dell, HP, and runs its own finance system and it is a requirement to have fully qualified personnel or Engineers on each field posted on devices to even request a meeting with the CUSD # 24 IT department for future proposals y any of the group of devices posted.
- CUSD # 24 IT Department does not allow or received proposals considered guess or assumptions on what CUSD IT department works with, and without an authorized study of the current network system and services by the IT department.
- IT Department currently is running with a consolidated services on voice with (Call managers and PRI's) Data and video, all trunking or tunneling Via Routers with filters in places following compliance with the Children's Internet Protection Act (CIPA).
- CUSD IT Department hosts its own Services including: Website, Web-Email, PowerSchool portal, finance system and many other applications and prefer to keep designed network because is functional and cost effective.
- References on successfully installs with other enterprises similar to CUSD # 24 configurations.
- If Providers is replaced, of future providers the responsibility is for the future provider to do the cut and installation based on your proposals and responsible on any failures and downtime that may occur.

- CUSD circuits ID’s; numbers, IP’s, DNS, Public IP’s and Private subnetting is requested to remain the same due to its complexity and other application, devices and multi-services reliance’s on each other on TELCO (POTS) and ISP (DNS, E-mail, Apps and PowerSchool Portal).
- Other.

The thoughtful consideration of all of these issues is a demanding and exacting task requiring the collaborative effort of IT department and technical staff with administrators.

The goal of the Chinle Unified Schools District # 24 (CUSD # 24) is to manage its Services as expresses, assets to derive maximum benefit to CUSD and its students and staff and to ensure that CUSD and its employees:

IT Guidelines on Services currently in place and descriptions: Telco and POTS.
